

Mike Hanigofsky
Facility Engineer
Alcoa, Mt. Holly

To whom it may concern,

I would like to take the time to express my satisfaction with the work performance of Roof Repair Incorporated at our facility. Mr. Gerace and his crew have operated in a very professional manner at our facility. His workers and staff have been timely, courteous, patient, and conscientious in their work performance. They have been safety conscious and have complied with Alcoa's safety protocols. Mr. Gerace has consistently stressed the importance of safety in all aspects of their operations and has worked to create very good documentation concerning safety on his work projects. In addition to his concern over the safety of his employees, Mr. Gerace also incorporates environmental concern and compliance during his company's work activities. Not only does his company utilize re-cycled materials, but he also consistently monitors his waste generation and segregation responsibilities.

The repair techniques used by Roof Repair Inc. have been very effective at Mt. Holly. The rubberized repair system used on the fiberglass and metal roofs at our facility have been successful and are very cost competitive in comparison to other systems / suppliers.

If you have any questions concerning their performance, please feel free to contact me at 843-569-8613 to discuss their performance at our facility.

Thank your for your attention,

Mike Hanigofsky
